Index of Subjects

Abomasal emptying
The relation between food intake and abomasal emptying and small intestinal transit time in sheep. **53**, 373, 1985

***N*-Acetylneuraminic acid**
Plasma concentrations of *N*-acetylneuraminic acid in severe malnutrition. **53**, 11, 1985

Adipocyte volume
The effects of dietary restriction and exercise on the volume of adipocytes in two intra-orbital depots in the guinea-pig. **53**, 207, 1985

Adolescent diet
What sort of teenager has low intakes of energy nutrients? **53**, 241, 1985

Alanine
Effects of meal consumption on whole body leucine and alanine kinetics in young adult men. **53**, 31, 1985

Amino acid availability
Nutritional availability of methionine, lysine and tryptophan in fish meals, as assessed with biological, microbiological and dye-binding assay procedures. **53**, 575, 1985

Amino acid losses
Stability of tryptophan during food processing and storage. 1. Comparative losses of tryptophan, lysine and methionine in different model systems. **53**, 281, 1985

Amino acids
Reactions of proteins with oxidizing lipids. 1. Analytical measurements of lipid oxidation and of amino acid losses in a whey protein–methyl linolenate model system. **53**, 61, 1985
Reactions of proteins with oxidizing lipids. 2. Influence on protein quality and on the bioavailability of lysine, methionine, cyst(e)ine and tryptophan as measured in rat assays. **53**, 75, 1985

Amylomaize starch
Increase in the ileal absorption rate of sodium taurocholate in germ-free or conventional rats given an amylomaize-starch diet. **53**, 307, 1985

Analytical tests
Stability of tryptophan during food processing and storage. 2. A comparison of methods used for the measurement of tryptophan losses in processed foods. **53**, 293, 1985

Anthropometric measurements
Prediction of body density from skinfold measurements in lactating women **53**, 485, 1985

Apolipoproteins
Modifications in plasma cholesterol and apolipoproteins of hypercholesterolaemic rats induced by ethanol-soluble factors of *Vicia faba*. **53**, 223, 1985

Bile acid absorption
Increase in the ileal absorption rate of sodium taurocholate in germ-free or conventional rats given an amylomaize-starch diet. **53**, 307, 1985

Bioavailability
Reactions of proteins with oxidizing lipids. 2. Influence on protein quality and on the bioavailability of lysine, methionine, cyst(e)ine and tryptophan as measured in rat assays. **53**, 75, 1985

Body density
Prediction of body density from skinfold measurements in lactating women **53**, 485, 1985

Bread
Iron availability from peas (*Pisum sativum*) and bread containing added pea testa in rats. **53**, 193, 1985

Breast milk
Breast-milk production and energy exchange in human lactation. **53**, 459, 1985

Brown adipose tissue
Effect of riboflavin deficiency on lipid metabolism of liver and brown adipose tissue of sucking rat pups. **53**, 107, 1985

Caecum
Gluconeogenesis from caecal propionate in the horse. **53**, 55, 1985
Urea turnover and transfer to the digestive tract in the rabbit. **53**, 183, 1985

Carbohydrate metabolism
The effect of dietary guar gum on the activities of some key enzymes of carbohydrate and lipid metabolism in mouse liver. **53**, 215, 1985

Cereal proteins
The effect of amino-acid-supplemented wheat gluten on cholesterol metabolism in the rat. **53**, 25, 1985
Relation of antigenic structure of cereal proteins to their toxicity in coeliac patients. **53**, 39, 1985

Chewing behaviour
Influences of cold exposure on digestion of organic matter, rates of passage of digesta in the gastrointestinal tract, and feeding and rumination behaviour in sheep given four forage diets in the chopped, or ground and pelleted form. **53**, 159, 1985

Cholesterol
The effect of amino-acid-supplemented wheat gluten on cholesterol metabolism in the rat. **53**, 25, 1985
Modifications in plasma cholesterol and apolipoproteins of hypercholesterolaemic rats induced by ethanol-soluble factors of *Vicia faba*. **53**, 223, 1985
The hypocholesterolaemic effects of pectins in rats. **53**, 409, 1985

Chromium-labelled markers
Retention time of chromium-labelled feed particles and of water in the gut of sheep given hay and concentrate at maintenance. **53**, 559, 1985

Coeliac disease
Relation of antigenic structure of cereal proteins to their toxicity in coeliac patients. **53**, 39, 1985

Cold exposure
Influences of cold exposure on digestion of organic matter, rates of passage of digesta in the gastrointestinal tract, and feeding and rumination behaviour in sheep given four forage diets in the chopped, or ground and pelleted form. **53**, 159, 1985
Effect of dietary protein concentration and ambient temperature on the energy, protein and water metabolism of the rat. **53**, 363, 1985

Colonic motility
The effect of indigestible particles on digestive transit time and colonic motility in dogs and pigs. **53**, 549, 1985

Copper bio-availability
A new bioassay for assessment of copper availability and its application in a study of the effect of molybdenum on the distribution of available Cu in ruminant digesta. **53**, 323, 1985

Copper deficiency
The effect of iron substrate on mitochondrial haem synthesis in copper deficiency. **53**, 131, 1985

Corticosterone
The effect of catabolic doses of corticosterone on heat production in the growing rat. **53**, 491, 1985

Diabetes
Abnormal essential fatty acid composition of tissue lipids in genetically diabetic mice is partially corrected by dietary linoleic and γ-linolenic acids. **53**, 449, 1985

Dietary fibre
Effect of in vitro fermentation using human faecal inoculum on the water-holding capacity of dietary fibre. **53**, 17, 1985
Reduction of the phytate content of bran by leavening in bread and its effect on zinc absorption in man. **53**, 47, 1985

Dietary supplementation
Dietary supplementation increases milk output in the rat. **53**, 1, 1985

Dietary survey
What sort of teenager has low intakes of energy nutrients? **53**, 241, 1985

Digesta flow
A multicompartmental model to describe marker excretion patterns in ruminant faeces. **53**, 663, 1985

Digestion
Influences of cold exposure on digestion of organic matter, rates of passage of digesta in the gastrointestinal tract, and feeding and rumination behaviour in sheep given four forage diets in the chopped, or ground and pelleted form. **53**, 159, 1985

Digestive tract
Urea turnover and transfer to the digestive tract in the rabbit. **53**, 183, 1985

Energy conservation
Mitochondrial uncoupling and the isodynamic equivalents of protein, fat and carbohydrate at the level of biochemical energy provision. **53**, 381, 1985

Energy exchange
Breast-milk production and energy exchange in human lactation. **53**, 459, 1985

Energy metabolism
Studies on the energy metabolism of the pregnant sow. 1. Uterus and mammary tissue development. **53**, 251, 1985
Studies on the energy metabolism of the pregnant sow. 2. The partition and utilization of metabolizable energy intake in pregnant and non-pregnant animals. **53**, 267, 1985

Energy utilization
Feeding frequency for lactating cows: effects on digestion, milk production and energy utilization. **53**, 117, 1985

Environmental temperature
Resting heat production in *Bos indicus* and their F_1 crosses with exotic breeds at a thermoneutral environment. **53**, 301, 1985
Effect of dietary protein concentration and ambient temperature on the energy, protein and water metabolism of the rat. **53**, 363, 1985

Essential fatty acids
Essential fatty acids in the liver and adipose tissue of genetically obese mice: effect of supplemental linoleic and γ-linolenic acids. **53**, 441, 1985
Abnormal essential fatty acid composition of tissue lipids in genetically diabetic mice is partially corrected by dietary linoleic and γ-linolenic acids. **53**, 449, 1985

Exercise
The effects of dietary restriction and exercise on the volume of adipocytes in two intra-orbital depots in the guinea-pig. **53**, 207, 1985
Effects of undernutrition and exercise during late pregnancy on uterine, fetal and uteroplacental metabolism in the ewe. **53**, 625, 1985

Factors influencing diet
What sort of teenager has low intakes of energy nutrients? **53**, 241, 1985

Feeding frequency
Feeding frequency for lactating cows: effects on digestion, milk production and energy utilization. **53**, 117, 1985

Fermentation
Effect of in vitro fermentation using human faecal inoculum on the water-holding capacity of dietary fibre. **53**, 17, 1985

Fibre
The hypocholesterolaemic effects of pectins in rats. **53**, 409, 1985

Fibre digestion
The digestion of fibre by pigs. 1. The effects of amount and type of fibre on apparent digestibility, nitrogen balance and rate of passage. **53**, 513, 1985

The digestion of fibre by pigs. 2. Volatile fatty acid concentrations in large intestine digesta. **53**, 531, 1985
The digestion of fibre by pigs. 3. Effects of the amount and type of fibre on physical characteristics of segments of the gastrointestinal tract. **53**, 537, 1985

Fishmeal
Performance of dairy cows offered isonitrogenous diets containing urea or fishmeal in early and in mid-lactation. **53**, 337, 1985
Nutritional availability of methionine, lysine and tryptophan in fish meals, as assessed with biological, microbiological and dye-binding assay procedures. **53**, 575, 1985

Folic acid
The threshold growth response of *Lactobacillus casei* to 5-methyl-tetrahydrofolic acid: implications for folate assays. **53**, 569, 1985

Food energy
Mitochondrial uncoupling and the isodynamic equivalents of protein, fat and carbohydrate at the level of biochemical energy provision. **53**, 381, 1985

Food intake
Effects of meal consumption on whole body leucine and alanine kinetics in young adult men. **53**, 31, 1985
The relation between food intake and abomasal emptying and small intestinal transit time in sheep. **53**, 373, 1985
Influence of feed intake and starvation on the magnitude of Na^+, K^+-ATPase (*EC* 3.6.1.3)-dependent respiration in duodenal mucosa of sheep. **53**, 605, 1985
Utilization of low-quality roughage by *Bos taurus* and *Bos indicus* cattle. 2. The effect of rumen-degradable nitrogen and sulphur on voluntary foodintake and rumen characteristics. 649,1985
The digestion by heifers of silage-containing diets fed at two dry matter intakes. 1. Digestion of organic matter and nitrogen. **53**, 691, 1985

Food restriction
The effects of dietary restriction and exercise on the volume of adipocytes in two intra-orbital depots in the guinea-pig. **53**, 207, 1985

Gangliosides and glycoproteins
Plasma concentrations of *N*-acetylneuraminic acid in severe malnutrition. **53**, 11, 1985

Gastric inhibitory polypeptide
The effect of guar gum on carbohydrate-, fat- and protein-stimulated gut hormone secretion: modification of postprandial gastric inhibitory polypeptide and gastrin responses. **53**, 467, 1985

Gastrin
The effect of guar gum on carbohydrate-, fat- and protein-stimulated gut hormone secretion: modification of postprandial gastric inhibitory polypeptide and gastrin responses. **53**, 467, 1985

Gastrointestinal tract
The digestion of fibre by pigs. 3. Effects of the amount and type of fibre on physical characteristics of segments of the gastrointestinal tract. **53**, 537,1985

Germ-free rat
Increase in the ileal absorption rate of sodium taurocholate in germ-free or conventional rats given an amylomaize-starch diet. **53**, 307, 1985

Gliadin
Relation of antigenic structure of cereal proteins to their toxicity in coeliac patients. **53**, 39, 1985

Gluconeogenesis
Gluconeogenesis from caecal propionate in the horse. **53**, 55, 1985

Gluten
The effect of amino-acid-supplemented wheat gluten on cholesterol metabolism in the rat. **53**, 25, 1985

Growth
Effect of dietary protein concentration and ambient temperature on the energy, protein and water metabolism of the rat. **53**, 363, 1985
The effect of catabolic doses of corticosterone on heat production in the growing rat. **53**, 491, 1985

Guar gum
The effect of dietary guar gum on the activities of some key enzymes of carbohydrate and lipid metabolism in mouse liver. **53**, 215, 1985
The effect of guar gum on carbohydrate-, fat- and protein-stimulated gut hormone secretion: modification of postprandial gastric inhibitory polypeptide and gastrin responses. **53**, 467, 1985

Haem synthesis
The effect of iron substrate on mitochondrial haem synthesis in copper deficiency. **53**, 131, 1985

Heat loss
Studies on the energy metabolism of the pregnant sow. 2. The partition and utilization of metabolizable energy intake in pregnant and non-pregnant animals. **53**, 267, 1985

Heat production
Resting heat production in *Bos indicus* and their F_1 crosses with exotic breeds at a thermoneutral environment. **53**, 301, 1985
The effect of catabolic doses of corticosterone on heat production in the growing rat. **53**, 491, 1985

Hypercholesterolaemia
Modifications in plasma cholesterol and apolipoproteins of hypercholesterolaemic rats induced by ethanol-soluble factors of *Vicia faba*. **53**, 223, 1985

Hypocholesterolaemia
The hypocholesterolaemic effects of pectins in rats. **53**, 409, 1985

Intestinal growth
Intestinal cellular proliferation and protein synthesis in zinc-deficient rats. **53**, 595, 1985

Intestinal transit time
The relation between food intake and abomasal emptying and small intestinal transit time in sheep. **53**, 373, 1985
The effect of indigestible particles on digestive transit time and colonic motility in dogs and pigs. **53**, 549, 1985

Iron availability
Iron availability from peas (*Pisum sativum*) and bread containing added pea testa in rats. **53**, 193, 1985

Iron retention
The retention of ^{59}Fe and ^{65}Zn by preruminant lambs given milk-substitutes based on either casein or soya-bean-protein isolate. **53**, 587, 1985
Iron utilization
The effect of iron substrate on mitochondrial haem synthesis in copper deficiency. **53**, 131, 1985
Kitten
The nitrogen requirement of the weanling kitten. **53**, 501, 1985
Laboratory diet
Differences in intestinal protein synthesis and cellular proliferation in well-nourished rats consuming conventional laboratory diets. **53**, 87, 1985
Lactation
Dietary supplementation increases milk output in the rat. **53**, 1, 1985
Feeding frequency for lactating cows: effects on digestion, milk production and energy utilization. **53**, 117, 1985
Performance of dairy cows offered isonitrogenous diets containing urea or fishmeal in early and in mid-lactation. **53**, 337, 1985
Zinc, copper and iron concentrations in the plasma and diets of lactating Nigerian women. **53**, 427, 1985
Breast-milk production and energy exchange in human lactation. **53**, 459, 1985
Prediction of body density from skinfold measurements in lactating women **53**, 485, 1985
Lactobacillus casei
The threshold growth response of *Lactobacillus casei* to 5-methyl-tetrahydrofolic acid: implications for folate assays. **53**, 569, 1985
Lactovegetarians
Selenium status in vegans and lactovegetarians. **53**, 199, 1985
Large intestine
The digestion of fibre by pigs. 2. Volatile fatty acid concentrations in large intestine digesta. **53**, 531, 1985
Letters to the Editors **53** 191, 1985
Leucine
Effects of meal consumption on whole body leucine and alanine kinetics in young adult men. **53**, 31, 1985
Lipid metabolism
Effect of riboflavin deficiency on lipid metabolism of liver and brown adipose tissue of sucking rat pups. **53**, 107, 1985
Lipogenic enzymes
The effect of dietary guar gum on the activities of some key enzymes of carbohydrate and lipid metabolism in mouse liver. **53**, 215, 1985
Lysine
An evaluation of total and digestible lysine as a predictor of lysine availability in protein concentrates for young pigs. **53**, 615, 1985
Malnutrition
Thiamin status in normal and malnourished children in Jamaica. **53**, 477, 1985
Markers
The effect of indigestible particles on digestive transit time and colonic motility in dogs and pigs. **53**, 549, 1985
Retention time of chromium-labelled feed particles and of water in the gut of sheep given hay and concentrate at maintenance. **53**, 559, 1985
A multicompartmental model to describe marker excretion patterns in ruminant faeces. **53**, 663, 1985
Methionine
The utilization by pigs of methionine from five protein concentrates compared with synthetic methionine. **53**, 391, 1985
Plasma amino acids and tissue methionine levels in fruit bats (*Rousettus aegyptiacus*) with nitrous oxide-induced vitamin B_{12} deficiency. **53**, 657, 1985
Methionine utilization
The digestion of protein in young pigs and the utilization of dietary methionine. **53**, 137, 1985
5-Methyl-tetrahydrofolic acid
The threshold growth response of *Lactobacillus casei* to 5-methyl-tetrahydrofolic acid: implications for folate assays. **53**, 569, 1985
Microbial markers
Removal of digesta components from the rumen of steers determined by sieving techniques and fluid, particulate and microbial markers. **53**, 347, 1985
Milk output
Dietary supplementation increases milk output in the rat. **53**, 1, 1985
Milk substitute
The retention of ^{59}Fe and ^{65}Zn by preruminant lambs given milk-substitutes based on either casein or soya-bean-protein isolate. **53**, 587, 1985
Digestion, absorption and utilization of single-cell protein by the preruminant calf. Abomasal outflow and its composition from calves given milk substitute diets containing varying amounts of either bacterial or yeast protein. **53**, 673, 1985
Mitochondrial uncoupling
Mitochondrial uncoupling and the isodynamic equivalents of protein, fat and carbohydrate at the level of biochemical energy provision. **53**, 381, 1985
Molybdenum–copper interaction
A new bioassay for assessment of copper availability and its application in a study of the effect of molybdenum on the distribution of available Cu in ruminant digesta. **53**, 323, 1985
Multicompartmental model
A multicompartmental model to describe marker excretion patterns in ruminant faeces. **53**, 663, 1985
Na^+, K^+-ATPase (*EC* 3.6.1.3)
Influence of feed intake and starvation on the magnitude of Na^+, K^+-ATPase (*EC* 3.6.1.3)-dependent respiration in duodenal mucosa of sheep. **53**, 605, 1985
Nitrogen balance
The digestion of fibre by pigs. 1. The effects of amount and type of fibre on apparent digestibility, nitrogen balance and rate of passage. **53**, 513, 1985

Nitrogen digestion
The digestion by heifers of silage-containing diets fed at two dry matter intakes. 1. Digestion of organic matter and nitrogen. **53**, 691, 1985
Nitrogen requirement
The nitrogen requirement of the weanling kitten. **53**, 501, 1985
Nitrous oxide
Plasma amino acids and tissue methionine levels in fruit bats (*Rousettus aegyptiacus*) with nitrous oxide-induced vitamin B_{12} deficiency. **53**, 657, 1985
Obesity
Essential fatty acids in the liver and adipose tissue of genetically obese mice: effect of supplemental linoleic and γ-linolenic acids. **53**, 441, 1985
Omasal laminae
The effect of lumen conditions on oxygen uptake in perfused omasal laminae. **53**, 311, 1985
Overfeeding
The effect of overfeeding newborn rabbits on the rate of skeletal maturation, as determined using a radiographic technique. **53**, 233, 1985
Oxidizing lipids
Reactions of proteins with oxidizing lipids. 1. Analytical measurements of lipid oxidation and of amino acid losses in a whey protein–methyl linolenate model system. **53**, 61, 1985
Reactions of proteins with oxidizing lipids. 2. Influence on protein quality and on the bioavailability of lysine, methionine, cyst(e)ine and tryptophan as measured in rat assays. **53**, 75, 1985
Oxygen uptake
The effect of lumen conditions on oxygen uptake in perfused omasal laminae. **53**, 311, 1985
Particulate material
Removal of digesta components from the rumen of steers determined by sieving techniques and fluid, particulate and microbial markers. **53**, 347, 1985
Pea (*Pisum sativum*) flour
Iron availability from peas (*Pisum sativum*) and bread containing added pea testa in rats. **53**, 193, 1985
Pectins
The hypocholesterolaemic effects of pectins in rats. **53**, 409, 1985
Phytic acid
Reduction of the phytate content of bran by leavening in bread and its effect on zinc absorption in man. **53**, 47, 1985
Pregnancy
Studies on the energy metabolism of the pregnant sow. 1. Uterus and mammary tissue development. **53**, 251, 1985
Studies on the energy metabolism of the pregnant sow. 2. The partition and utilization of metabolizable energy intake in pregnant and non-pregnant animals. **53**, 267, 1985
Effects of undernutrition and exercise during late pregnancy on uterine, fetal and uteroplacental metabolism in the ewe. **53**, 625, 1985
Preruminant calf
Digestion, absorption and utilization of single-cell protein by the preruminant calf. Abomasal outflow and its composition from calves given milk substitute diets containing varying amounts of either bacterial or yeast protein. **53**, 673, 1985
Preruminant lamb
The retention of ^{59}Fe and ^{65}Zn by preruminant lambs given milk-substitutes based on either casein or soya-bean-protein isolate. **53**, 587, 1985
Processed foods
Stability of tryptophan during food processing and storage. 1. Comparative losses of tryptophan, lysine and methionine in different model systems. **53**, 281, 1985
Stability of tryptophan during food processing and storage. 2. A comparison of methods used for the measurement of tryptophan losses in processed foods. **53**, 293, 1985
Propionate
Gluconeogenesis from caecal propionate in the horse. **53**, 55, 1985
Protein
Reactions of proteins with oxidizing lipids. 1. Analytical measurements of lipid oxidation and of amino acid losses in a whey protein–methyl linolenate model system. **53**, 61, 1985
Reactions of proteins with oxidizing lipids. 2. Influence on protein quality and on the bioavailability of lysine, methionine, cyst(e)ine and tryptophan as measured in rat assays. **53**, 75, 1985
Effect of dietary protein concentration and ambient temperature on the energy, protein and water metabolism of the rat. **53**, 363, 1985
Protein adsorption
Adsorption of soluble proteins to rumen bacteria and the role of adsorption in proteolysis. **53**, 399, 1985
Protein concentrates
The utilization by pigs of methionine from five protein concentrates compared with synthetic methionine. **53**, 391, 1985
An evaluation of total and digestible lysine as a predictor of lysine availability in protein concentrates for young pigs. **53**, 615, 1985
Protein deficiency
Evidence suggesting that the elevated plasma triiodothyronine concentration of rats fed on protein-deficient diets is physiologically active. **53**, 175, 1985
Protein digestion
The digestion of protein in young pigs and the utilization of dietary methionine. **53**, 137, 1985
Protein synthesis
Differences in intestinal protein synthesis and cellular proliferation in well-nourished rats consuming conventional laboratory diets. **53**, 87, 1985
Protein–energy malnutrition
Plasma concentrations of *N*-acetylneuraminic acid in severe malnutrition. **53**, 11, 1985
Rainbow trout (*Salmo gairdneri*)
Some effects of vitamin E and selenium deprivation on tissue enzyme levels and indices of tissue peroxidation in rainbow trout (*Salmo gairdneri*). **53**, 149, 1985

Reproduction
Effect of riboflavin deficiency on reproductive performance and on biochemical indices of riboflavin status in the rat. **53**, 97, 1985
Reproductive development
Studies on the energy metabolism of the pregnant sow. 1. Uterus and mammary tissue development. **53**, 251, 1985
Retention time
Retention time of chromium-labelled feed particles and of water in the gut of sheep given hay and concentrate at maintenance. **53**, 559, 1985
Riboflavin deficiency
Effect of riboflavin deficiency on reproductive performance and on biochemical indices of riboflavin status in the rat. **53**, 97, 1985
Effect of riboflavin deficiency on lipid metabolism of liver and brown adipose tissue of sucking rat pups. **53**, 107, 1985
Roughage
Utilization of low-quality roughage by *Bos taurus* and *Bos indicus* cattle. 1. Rumen digestion. **53**, 637, 1985
Utilization of low-quality roughage by *Bos taurus* and *Bos indicus* cattle. 2. The effect of rumen-degradable nitrogen and sulphur on voluntary food intake and rumen characteristics. **53**,
Rumen bacteria
Adsorption of soluble proteins to rumen bacteria and the role of adsorption in proteolysis. **53**, 399, 1985
Rumen digestion
Utilization of low-quality roughage by *Bos taurus* and *Bos indicus* cattle. 1. Rumen digestion. **53**, 637, 1985
Rumen kinetics
Removal of digesta components from the rumen of steers determined by sieving techniques and fluid, particulate and microbial markers. **53**, 347, 1985
Ruminant forestomach
The effect of lumen conditions on oxygen uptake in perfused omasal laminae. **53**, 311, 1985
Selenium
Some effects of vitamin E and selenium deprivation on tissue enzyme levels and indices of tissue peroxidation in rainbow trout (*Salmo gairdneri*). **53**, 149, 1985
Selenium status
Selenium status in vegans and lactovegetarians. **53**, 199, 1985
Silage diet
The digestion by heifers of silage-containing diets fed at two dry matter intakes. 1. Digestion of organic matter and nitrogen. **53**, 691, 1985
Single-cell protein
Digestion, absorption and utilization of single-cell protein by the preruminant calf. Abomasal outflow and its composition from calves given milk substitute diets containing varying amounts of either bacterial or yeast protein. **53**, 673, 1985
Skeletal maturation
The effect of overfeeding newborn rabbits on the rate of skeletal maturation, as determined using a radiographic technique. **53**, 233, 1985
Skinfold thickness
Prediction of body density from skinfold measurements in lactating women **53**, 485, 1985
Small intestine
Differences in intestinal protein synthesis and cellular proliferation in well-nourished rats consuming conventional laboratory diets. **53**, 87, 1985
Intestinal cellular proliferation and protein synthesis in zinc-deficient rats. **53**, 595, 1985
Starvation
Influence of feed intake and starvation on the magnitude of Na^+, K^+-ATPase (*EC* 3.6.1.3)-dependent respiration in duodenal mucosa of sheep. **53**, 605, 1985
Thermogenesis
Evidence suggesting that the elevated plasma triiodothyronine concentration of rats fed on protein-deficient diets is physiologically active. **53**, 175, 1985
Thiamin
Thiamin status in normal and malnourished children in Jamaica. **53**, 477, 1985
Trace elements
Zinc, copper and iron concentrations in the plasma and diets of lactating Nigerian women. **53**, 427, 1985
Triiodothyronine
Evidence suggesting that the elevated plasma triiodothyronine concentration of rats fed on protein-deficient diets is physiologically active. **53**, 175, 1985
Tryptophan stability
Stability of tryptophan during food processing and storage. 1. Comparative losses of tryptophan, lysine and methionine in different model systems. **53**, 281, 1985
Stability of tryptophan during food processing and storage. 2. A comparison of methods used for the measurement of tryptophan losses in processed foods. **53**, 293, 1985
Undernutrition
Effects of undernutrition and exercise during late pregnancy on uterine, fetal and uteroplacental metabolism in the ewe. **53**, 625, 1985
Urea
Urea turnover and transfer to the digestive tract in the rabbit. **53**, 183, 1985
Performance of dairy cows offered isonitrogenous diets containing urea or fishmeal in early and in mid-lactation. **53**, 337, 1985
Vegans
Selenium status in vegans and lactovegetarians. **53**, 199, 1985
Vitamin B_{12} deficiency
Plasma amino acids and tissue methionine levels in fruit bats (*Rousettus aegyptiacus*) with nitrous oxide-induced vitamin B_{12} deficiency. **53**, 657, 1985
Vitamin E
Some effects of vitamin E and selenium deprivation on tissue enzyme levels and indices of tissue peroxidation in rainbow trout (*Salmo gairdneri*). **53**, 149, 1985

Volatile fatty acids
The digestion of fibre by pigs. 2. Volatile fatty acid concentrations in large intestine digesta.
53, 531, 1985

Water-holding capacity
Effect of in vitro fermentation using human faecal inoculum on the water-holding capacity of dietary fibre. **53**, 17, 1985

Zinc
Zinc, copper and iron concentrations in the plasma and diets of lactating Nigerian women.
53, 427, 1985

Zinc absorption
Reduction of the phytate content of bran by leavening in bread and its effect on zinc absorption in man. **53**, 47, 1985

Zinc deficiency
Intestinal cellular proliferation and protein synthesis in zinc-deficient rats. **53**, 595, 1985

Zinc retention
The retention of ^{59}Fe and ^{65}Zn by preruminant lambs given milk-substitutes based on either casein or soya-bean-protein isolate.
53, 587, 1985
